

Integrated Solution for MOTOTRBO™

- ✓ Premium control room solution
- ✓ Networks of any size and topology
- ✓ Bridging for different radio networks

SmartPTT PLUS is a professional dispatch software solution providing integrated fully-featured dispatch control over multi-site and multi-channel systems. Designed exclusively for MOTOTRBO digital two-way radio systems, this control room solution supports voice communications and data operations in Linked Capacity Plus, Capacity Plus, IP Site Connect and Connect Plus.

SmartPTT PLUS leverages the enhanced wireline MOTOTRBO Network Application Interface (NAI) which allows dispatchers to interface directly with the repeaters over IP, improving the system stability, security and reliability and also reducing hardware overheads and lowering maintenance costs.
