

Integrated Solution for MOTOTRBO™

SmartPTT

 **SOLD AND SUPPORTED**

- ✓ Premium control room solution
- ✓ Networks of any size and topology
- ✓ Bridging for different radio networks

BEST SOLUTION FOR BIG SYSTEMS

MOTOTRBO Capacity Max and SmartPTT PLUS open new horizons: regional and state-wide networks for emergency services, energy networks, pipelines, networks of mines,... **THINK BIG!**

SmartPTT PLUS

Premium Control Room Solution

- Integrated full-featured dispatch control over multisite and multichannel systems based on all MOTOTRBO topologies.
- Complete support for MOTOTRBO Capacity Max systems, including voice dispatch, call recording, telephone interconnect and data services.

MOTOTRBO Capacity Max

Next Generation Trunking Solution

- Flexible deployment
- Increased capacity and scalability
- Enhanced performance and feature-set
- Improved management and monitoring

SMARTPTT PLUS AND CAPACITY MAX — BEST FOR BIG SYSTEMS

- ✓ Distributed architecture
- ✓ High throughput
- ✓ Exceptional system sustainability
- ✓ Can handle thousands of subscribers and hundreds of sites
- ✓ Wide feature-set

INCREASED CAPACITY

Support for

- Up to 250 sites
- Up to 15 voice gateways (primary, secondary pairs)
- Data gateway (primary, secondary pair)

OPERATION OF A LARGE SYSTEM WITHOUT HEADACHE

Expanded Trunked Controller Redundancy

New level of system sustainability! Provide smooth operation of the system: in case of primary controller failure, redundant ones will continue to provide system operation.

Data Gateway Redundancy

Support for MNIS Data Gateway Redundancy – truly important ability to reserve Data Gateway that allows to reduce loss of important data.

SPECIAL COMMUNICATION OPPORTUNITIES

FOACSU Calls, Call End, Group Broadcast Calls

- Ability to make and receive private FOACSU calls
- Tools for call ending
- Group broadcast calls

FASTER REACTION IN CASE OF EMERGENCY

System-wide All Call

Immediately notify all users in the radio system. Save time and even lives in critical situations by instant information broadcast.

Priority of the dispatcher call during the Emergency Call can be set activating the "Prioritize calls during emergency" item.

ENSURE INTEGRITY OF CONFIDENTIAL INFORMATION

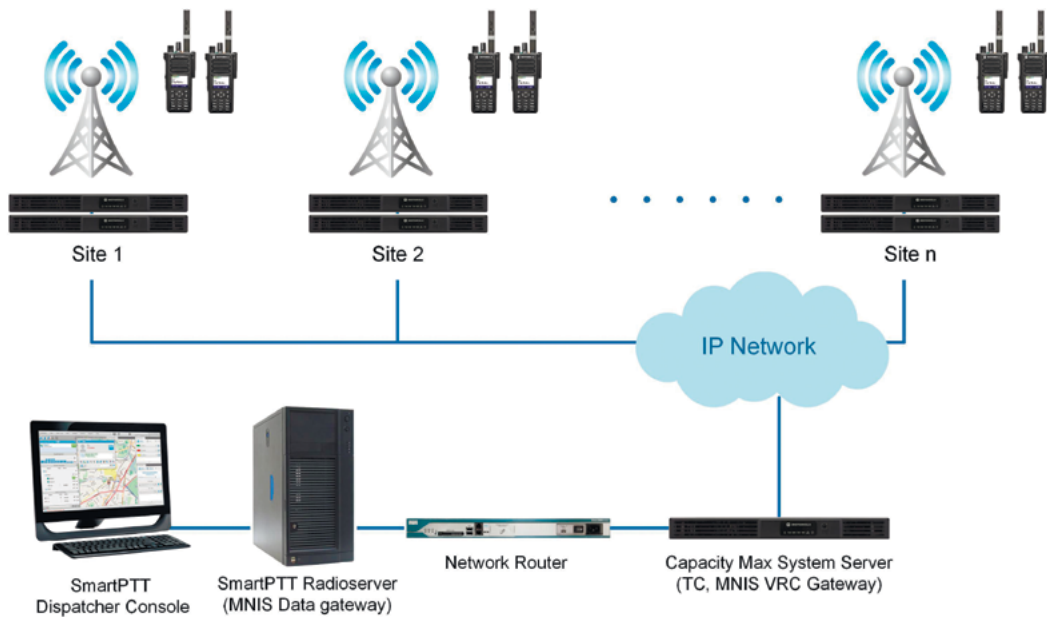

Wireline Console Radio Kill

Radio Kill is a really powerful feature - you'll be able to preserve confidential information. This command allows to remotely kill the radio using SmartPTT.

Note: Killed radio can be revived only in Motorola Solutions service center. You can limit the access to this feature by user and password.

ARCHITECTURE: HOW IT WORKS

PROJECTS IN PROGRESS

- ✓ Transport and Logistics: Sea Port in Indonesia
- ✓ Municipality: Region Administration in Russia
- ✓ Agriculture: Fishery in China
