

## Dispatch Communication Solution for **TRANSPORTATION**

**RELIABLE COMMUNICATION AND  
REAL-TIME FLEET AWARENESS**

**HOW TO ENHANCE  
COMMUNICATION  
EFFICIENCY?**

**HOW TO MONITOR  
DRIVER BEHAVIOR?**

**HOW TO INCREASE  
DRIVER SAFETY?**

From couriers and long-haul trucking to public transit and waste management, transportation operations rely on clear communication and precise coordination. SmartPTT delivers a powerful dispatch and control room solution designed to keep your mobile workforce connected, informed, and on schedule—no matter where they travel.

# WORKER AND VEHICLE SAFETY

When every second counts, dispatchers need to know exactly where drivers are and how to reach them. SmartPTT provides:

## Voice Dispatch

Communication between the dispatchers and field radios.

## GPS Tracking

Real-time visibility of fleet vehicles, ensuring immediate location access during routine operations or emergencies.

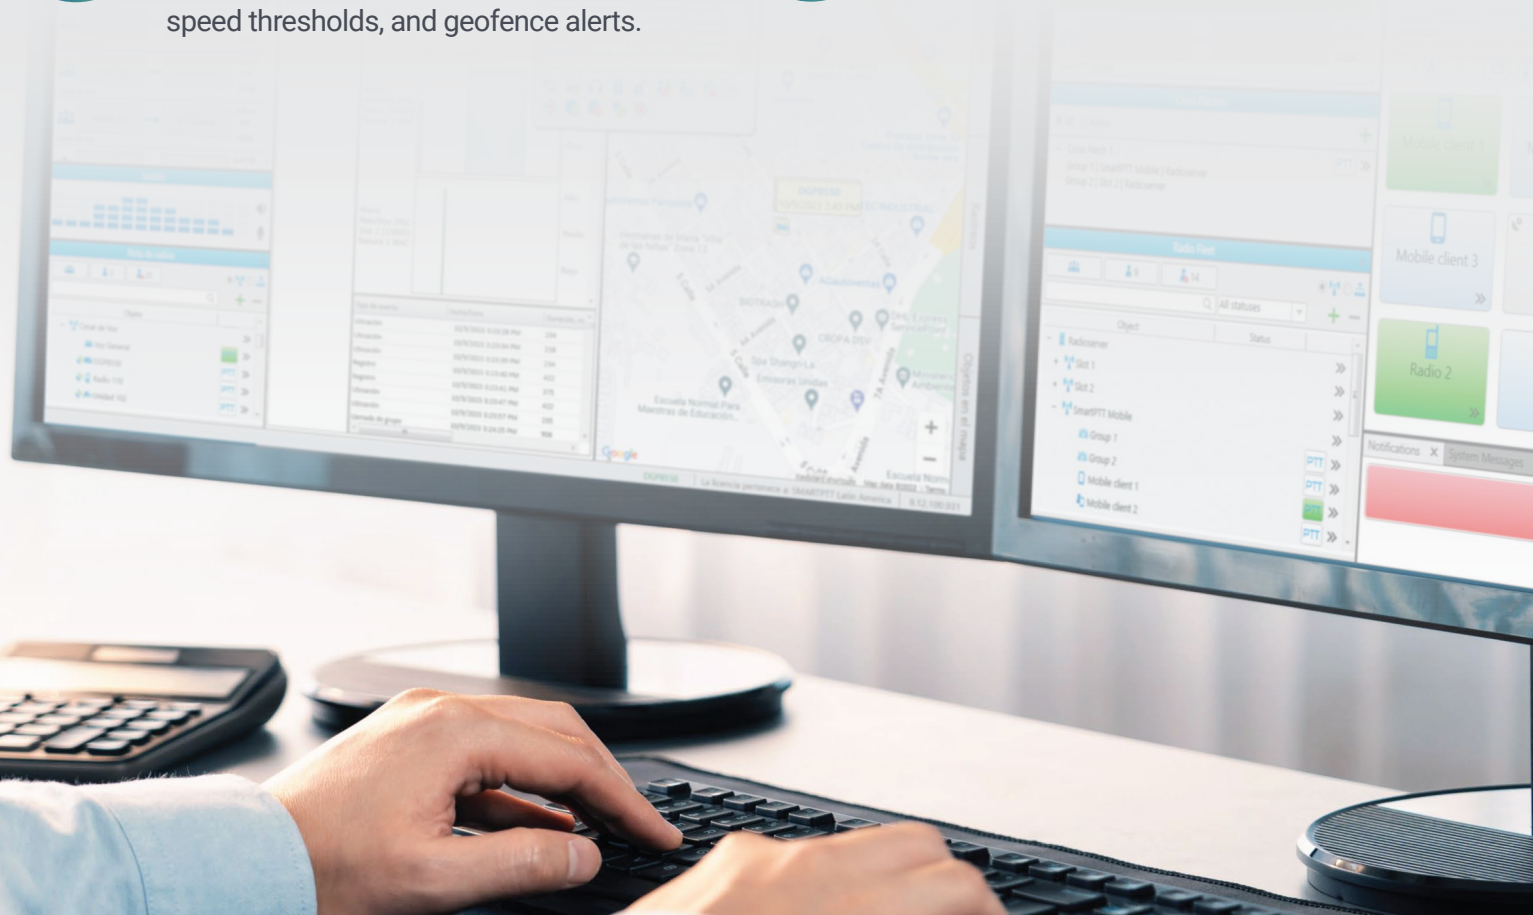

## Event Logging

Automatic recording of key events, including emergency button activation, speed thresholds, and geofence alerts.

## Voice Recording

Complete, time-stamped call history for post-incident review and accountability.

Improve situational awareness, reduce response time, and ensure driver safety with SmartPTT's reliable MOTOTRBO integration.

# EFFICIENT COMMUNICATIONS

Coordinating field teams over large regions demands seamless communication. SmartPTT provides centralized Voice Dispatch with features that keep drivers and dispatchers connected:

- All calls, group calls, and private calls for individual or fleet-wide coordination.
- Emergency and priority call handling.
- Channel and system monitoring for clear, uninterrupted communication.

Maintain efficient voice communications across couriers, delivery fleets, or transit vehicles—whether operating locally or regionally.

Effective route management can lead to significant cost savings, improved customer satisfaction, and enhanced operational efficiency in logistics .

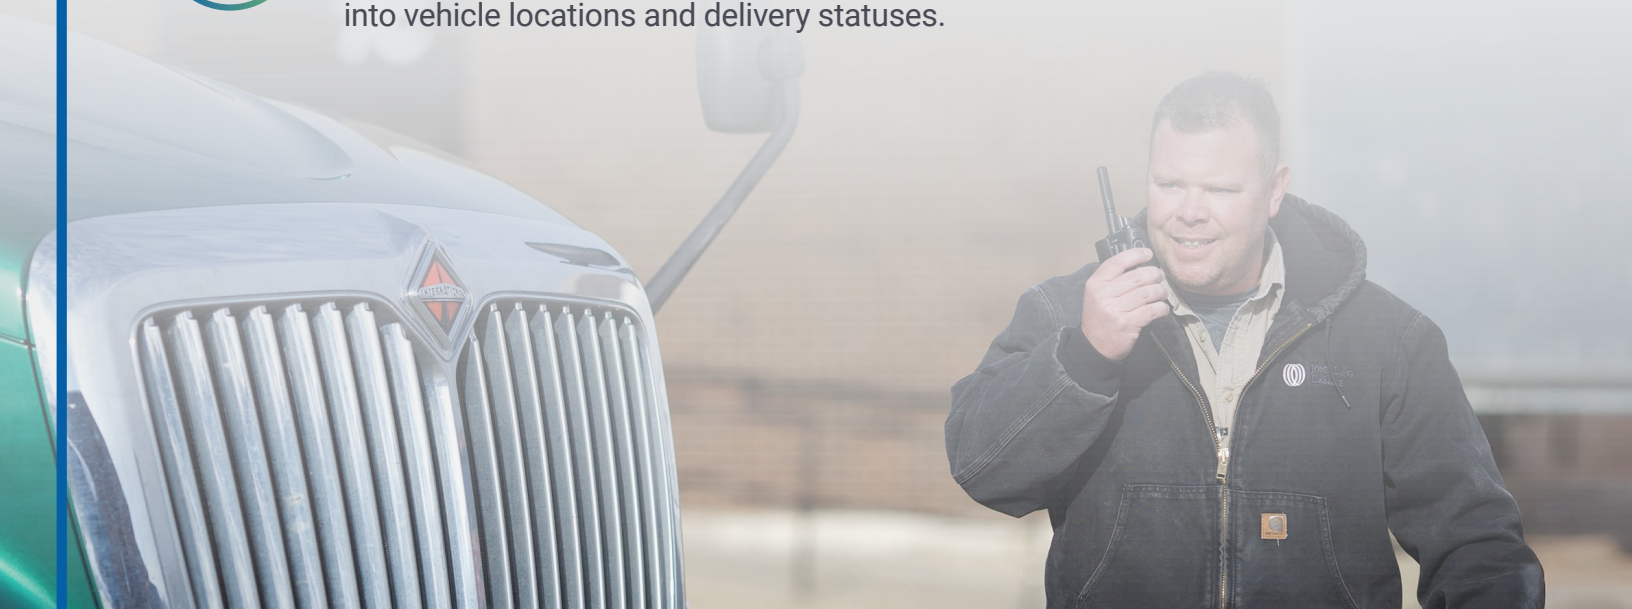

## Route Planning

Determining the best paths for vehicles or teams.

## Driver and Vehicle real time Tracking

Utilizing SmartPTT to monitor routes and driver performance, ensuring timely deliveries and customer satisfaction. SmartPTT provides live visibility into vehicle locations and delivery statuses.

# ROUTE VISIBILITY AND ACCOUNTABILITY

SmartPTT gives operations managers full visibility into vehicle movement history and performance:

- Playback routes and events to verify service delivery, monitor driving patterns, and be alerted if a driver deviates from an assigned route.

- Integrated mapping supports Google Maps, OpenStreetMap, and offline map options.

- Geofencing alerts provide instant notification when vehicles enter or exit defined service areas.

Gain confidence knowing where your vehicles have been and how they performed throughout the day.

---

## TASK MANAGEMENT AND PRODUCTIVITY

**Job Ticketing** helps dispatchers assign, track, and close tasks directly within the SmartPTT console:

- Create and assign tickets for pickups, deliveries, and service calls.
- Monitor task progress in real time.
- Receive automatic status updates when a job is completed or delayed.

Keep your fleet productive by tracking every task—from dispatch to completion—without the need for radio calls or paper logs.

## BENEFITS AT A GLANCE

---

- Reliable communications with your fleet.
- Real-time GPS visibility and route playback.
- Immediate access to driver locations during emergencies.
- Task management and workflow tracking via Job Ticketing.
- Complete event and voice recording for safety and compliance.

# A SMARTER WAY TO MOVE

SmartPTT streamlines communications and workforce coordination for the transportation industry—helping your team arrive safely, efficiently, and on time. Whether managing a delivery fleet or a public transit network, SmartPTT ensures you stay connected, aware, and in control.
